What is ALS?

Often referred to as Lou Gehrig's Disease, ALS is a deadly neuromuscular disease that slowly robs the body of its ability to walk, speak, eat, and eventually breathe. There is no known cause and no cure for ALS.

What is The Walk to Defeat ALS™?

It's an opportunity to bring hope to ALS patients, to raise money for a cure, and to fight for something you care about. All funds raised support patient care and research to find a cure for ALS.
